Pravým tlačidlom myši kliknete na ikonu Customer Monitoru v paneli nástrojov čím si otvoríte krátke menu funkcíí, v ktorom následne ľavým tlačidlom kliknete na dvojitú šípku vo vrchnej časti okna. Po kliknutí sa Vám otvorí ďalšie menu v ktorom si viete vyberať zo širokej ponuky funkcií. V tomto okne prejdete na možnosť "Scheduler - Monitor Console", ktorá nám otvorí okno pre výber testovaní.

Obrázok: Monitor Console Watch Select

Následne v **1. kroku** si zvolíme funkciu "Watches", ktorá nám otvorí okno pre vytvorenie watchu. V **2.kroku** pridáme nový watch stlačením <u>zeleného tlačidla plus</u> v hornej lište, čo nám otvorí okno, v ktorom následne zadáme názov nového watchu, čo je zobrazené v **kroku 3**. Následne v **kroku 4** otvoríme ponuku podmienok pre testovanie. Týmto spôsobom otvoríme ďalšie okno, ktoré nám ponúka množstvo podmienok, ktoré môžeme v rámci watchu otestovať.

Platnosť SSL certifikátu Zverejnené na Customer Monitor (https://customermonitor.sk)

Obrázok: Monitore Console Conditions Select

Pre účely testovania SSL certifikátov si zvolíme <u>HTTPS Certificate Remaining Validity</u>, ako je to naznačené v **kroku 5**. Do políčka "Url" na vrchu (**krok 6**.) vložíme https adresu, ktorú chceme otestovať a parametre na základe ktorých sa má test vyhodnocovať ako je to znázornené v **kroku 7** (pre účely nášho testovania sme si vybrali aby boli v poriadku všetky certifikáty s platnosťou viac ako 30 dní a periódou testovania 1 hodina, samotný test trvá len sekúnd). V **8. kroku** si vyberieme podmienku podľa, ktorej sa nám údaj v CM zmení raz denne a prednastaví sa automaticky.
